

Help us shape the
future while
shaping yours

SIEMENS
Ingenuity for life

Junior Technical Support Fire Safety - 188924 (temporary assignment, 1 year)

Your new role – challenging and future-oriented:

- You will be integrated into an operational team starting on your very first day, with whom you will work on different projects.
- The tutor — an experienced professional — will give assistance, guiding you through the internship with know-how and advice.

Your qualifications – solid and appropriate:

- Student, graduate or following a Master program in Engineering Installation field - Systems Engineering Fire Safety and Physical Security;
- Achievements in academic and/or non-academic activities are a plus;
- Internship experience in Fire Safety and Security industry is a plus;
- Analytical and critical thinking;
- Open-minded, innovative and responsible;
- Motivated and with the ability to learn and grow;
- Good interaction and communication at all levels of the company;
- Very good English skills – written and spoken;
- Excellent Microsoft Office and AUTOCAD skills;

What we offer:

- Paid working student program plus additional benefits (meal tickets, gift tickets, medical subscription, etc.);
- Possibility to become a permanent colleague of ours after 1 year;
- Real life working experience;
- An opportunity to learn and grow;
- An open environment where you can express your ideas and take initiatives;
- A very nice set up, where we really care about our people;

What else should I know?

- Working program flexibility: 4, 6, 8 hours/day.
